KA458

Before - Riddiford Street for maximum encouragement of motor vehicle use

After - Riddiford Street as a safer, more attractive space for all transport modes

# **The good, the bad and the ugly - a short field trip to Newtown**

Are these inviting places to be? Why / why not?

How do Newtown kids get to school?

What are those green bike boxes at traffic lights for?

How can street and urban design add to community resilience?

Cycling reduces your risk of heart disease, some cancers, diabetes and mental illness. Yet right outside the hospital, on the widest street in Newtown, there's no cycle lanes.

And where's a good place to get coffee and sushi?
